If the cells turn red in the SJ tabs it means
- individual rounds - they are placed equ
between them. Eg equal 1st, you split the
the 2 riders = 9.5 points each (10+9)/2
- overall - most firsts, if still equal, most s
still equal, highest place in the highest ro
Nerang)

For clear rounds, just put a "Y" in the Clea

s you have a duplicate value:
al but you need to split the points
e points for 1st and 2nd between

econds, if still equal, most thirds, if
und (I'd say it would be the AM7 in

ar? column and this will count the Qs
