BITS:
If Gear Check is unsure of mouthpiece, riders can be requested to drop bit out of mouth OR rider to open horse’s mouth so bit can be examined.

The Chief Instructors’ Panel recommend the use of the ordinary snaffle bit for all facets of Pony Club activity. This does not mean that no other bit may be used. Sometimes, a combination of horse, rider & situation may demand the use of some other bit. The use of an ordinary snaffle is advocated because it is one of the mildest bits. It has been found that horses schooled with this type of bit can be worked for any type of work.

Judges should not at any time penalise a rider using a snaffle bit in riding classes as her/she is using far greater skill in controlling the horse than a rider using a double bridle or some other type of bit.

- The Bit can consist of metal, leather, rubber, copper, sweet metal, flexi plastic (Mar 07) or synthetic material.
- The thickness of the bit must be such as not to harm the horse and not less than 6mm diameter. Bit measured 25mm from attachment to ring or shank.
- The bit can only have a ring of a size not less than 50mm in diameter
- It is recommended that loose rings have cheekers/bit guards. (Check Specific Discipline)
- The bit must have only a single mouthpiece, but may have more than one joint (Check specific discipline)
- The length of the shank on a leverage bit (e.g. Pelham, Dutch Gag, etc) is in ratio of 3:1 (below and above the bit).
- The height of the port or tongue control must not exceed 20mm.
- Stainless steel bits are recommended because of durability.

ONLY THE ABOVE BITS ARE ALLOWED (REFER TO DIAGRAMS OF BITS FOR BITS ALLOWED/NOT ALLOWED)
Any combination of mouth piece/ring/cheeks
For Bits for specific disciplines (e.g. Dressage Competition) refer Over Page

b) twisted and wire bits are prohibited
c) bits must be made of metal, rigid plastic, or durable synthetic material and may be covered with rubber or latex
d) bits must not place mechanical restraint upon the tongue
e) the diameter of the mouthpiece must be such so as not to hurt the horse
f) the diameter of the mouthpiece is measured adjacent to the rings or the cheeks of the mouthpiece
g) mouthpieces may be the same thickness or tapered towards the centre or central joints
h) wrapping of bit with any kind of material is not permitted

Snaffle Bits
The use of non-approved bit/s or incorrect thickness of bit/s will entail elimination. Bit measurement has a tolerance of +/-1mm.
Only snaffle bits that have the following features are approved for use in dressage:

a) the minimum diameter of the mouthpiece is 10mm for ponies including Young Pony competitions and 12mm for horses (14mm in Young horse competitions see rule 9.1.2)
b) snaffle bits may be used with loose ring, D-Ring, eggbutt or hanging cheeks (Baucher). Single or double-jointed snaffles may also be used with upper or lower cheeks, hanging cheeks, full cheeks or Fulmer cheeks. Loose rings may have a sleeve fitted around part of the ring
c) a snaffle may have up to two joints. A bushing or coupling is permitted as the centre link in a double-jointed snaffle; however, the surface of the centre piece must be solid with no moveable parts other than a roller. The centre link may be tilted in a different orientation from the mouthpiece but must have rounded edges and may not have the effect of a tongue plate
d) a double-jointed snaffle or snaffle with rotating mouthpiece may be shaped to allow tongue relief. The maximum height of the deviation is 30mm from the lower part of tongue side to the highest part of the deviation. The widest part of the deviation must be where the mouthpiece contacts the tongue and must have a minimum width of 30mm. The mouthpiece of a jointed or unjointed snaffle may be shaped in a curve within the dimensions specified above
e) forward curved bits are permitted but not with hanging cheeks and they must have a joint (i.e. centrepiece must move) and can have fixed or loose ring
Keeping within the definition above, some of the types of bits permitted are described and illustrated at the end of this section in rule 5.20. Also permitted but not illustrated:

f) half-moon — port-mouth — curved
g) rubber or synthetic bits covering metal (but not chain) — both jointed and unjointed
h) sweet iron bit
